

## AT-Race 4' x 8' Face Frame Assembly Table

Take assembly to a whole new level with our AT-Race Tables: decrease the time needed for assembly and increase the quality of the work done. Our Assembly Tables have an open-back design with clamping arms that smoothly glide on an open beam, providing added capacity for handling larger face frames or assemblies which extend beyond the top of the table. The AT-Race tables have an extremely high-quality build, providing a stable and secure work surface. They are also maneuverable, enabling movement and positioning on the shop floor.

The rigid steel arm, constructed out of Unistrut, will stand up to years of use, while Castle's proprietary quick-clamps feature centered activation for easy clamping from either direction and automatically lock into position. The open back design gives you more work area and can handle oversize frames without taking up valuable shop space.

When you're in need of a premier face frame and woodworking assembly table, turn to Castle USA. We pride ourselves on providing our customers with the absolute best, highest quality, tables available.

### FEATURES AND BENEFITS INCLUDE:

- Professional Face Frame & Woodworking Assembly Table
- Open back design:
  - Accepts oversized frames and other large assemblies
  - Maximizes work area
- Unistrut clamping arms with three adjustable air cylinders hold work firmly for easy assembly and minimal sanding
- 45 Degree, 1" laminated top for easy glue clean-up and less operator fatigue than horizontal clamping tables
- Built-in driver holster keeps driver within easy reach for increased convenience and efficiency (driver sold separately)
- Convenient, integrated connection port for air powered driver adjacent to driver holster
- High-quality, industrial build for a stable and secure work surface
- Maneuverable for positioning on the shop floor

### TECHNICAL SPECIFICATIONS:

- Unistrut rigid steel arm with proprietary, Castle quick-clamps
- Footprint: 113" x 43" x 79"
- Assembly required
- Driver sold separately
- Manufactured in the USA

*"Best on the market! I bought my first one of these about 6 years ago. We had a [competitor] face frame table before this one and thought it was great. This [Castle] table really put it into perspective. Leaps and bounds better than the [competitor] table.*

*We expanded our shop and needed two at the time. When we purchased our third table we didn't even consider the [competitor] table. Also Castle's customer service is second to none!"*

**Christopher Smith**

## AT-Race 4' x 12' Face Frame Assembly Table

Create a two-person work cell with the AT Race 4' x 12' - it includes both left- and right-side fences. Take assembly to a whole new level: decrease the time needed for assembly and increase the quality of the work done. Our Assembly Tables have an open-back design with clamping arms that smoothly glide on an open beam, providing added capacity for handling larger face frames or assemblies which extend beyond the top of the table. The AT-Race tables have an extremely high-quality build, providing a stable and secure work surface. They are also maneuverable, enabling movement and positioning on the shop floor.

Castle's proprietary quick-clamps feature centered activation for easy clamping from either direction and automatically lock into position. The rigid steel arm, constructed out of Unistrut, will stand up to years of use, while the open back design gives you more work area and can handle oversize frames without taking up valuable shop space.
